IN ARIA! NETWORKS THE GLOBAL LOW LATENCY LIVE VIDEO TRANSPORT MANAGED SERVICE

InAria! NETWORKS

In Aria! Networks is a leading live & secure video transport service provider with its flagship Ottvideo V.7 routing protocol and managed live video transport network CDN. We developed a secure proprietary protocol over UDP and a Video Routing OS that helps service providers replace costly MPLS, 1+1 fiber dedicated networks and satellite contribution links for low latency fully lossless broadcast and surveillance video contribution and distribution to media headends and surveillance video analytics clouds.

In Aria! Networks Live CDN is powered by OttvideoOS, the video routing stack with MpegTS and SDI Inputs and Outputs running on different proprietary networking gear, virtual machines and carrier grade equipment. We focus on changing the way professional live video is distributed globally, with an efficient, faster, more flexible software based Over the Top approach.

THE INDUSTRY MOST ROBUST PROFESSIONAL LIVE VIDEO TRANSPORT PROTOCOL

PATENT PENDING DUAL PROTECTION MECHANISM WITH MINIMAL LATENCY AND MOST FLEXIBLE ADVANCED PARAMETERS

Ottvideo V.7 video routing protocol makes Broadcast Grade live video contribution and distribution possible over the public Internet at very low latency. Our live professional video routing technology solves the problem of moving HD and Ultra HD video contributions consistently, with universal reach and under most network conditions over long haul public IP Transit.

We solve a key industry need for media and live content producing organizations: a gigantic market stuck with legacy, costly satellite links and dedicated fiber networks. Ottvideo V.7 secure video routing protocol and CDN is a faster, cheaper, more flexible approach compared to traditional Telcos and Satellite operators based solutions: same results, software based Over the Top approach.

INSTALLED ON HUNDREDS OF VIDEO ROUTERS

OTTVIDEO V.7 "CLEANS UP" THE CONGESTIONS AND INSTABILITIES OF THE GLOBAL INTERNET FOR VERY RELIABLE HD VIDEO CONTRIBUTION AND DISTRIBUTION SERVICES
